In addition, refer to the HPPLC Guidebook medicine section for more information on medical school admission requirements. Students should follow the Chemistry Department placement guidelines at <https://www.chem.indiana.edu/undergraduate/c117-eligibility>. Students wanting or needing prep before CHEM-C 117, could complete the ALEKS Review Course or take CHEM-C 103, as in plans #1, #4, or #6 above. Background in chemistry is needed for BIOL-L 112. Biology department guidelines recommend previous or concurrent enrollment in CHEM-C 117. Psychology, Sociology, and Statistics should be taken any term prior to the MCAT.
